WORK EXPERIENCE

PETLYcbd (https://petlycbd.com)   San Diego, CA
Contracted Web Developer   August 2019 – January 2020
- Customized existing Shopify theme to client's needs by creating new schemas and components
- Applied the client's color palette to the theme by changing the settings in the theme. If settings were not present then I created them in the schema

NanocraftCBD (https://nanocraftcbd.com)   San Diego, CA
Contracted Front-end Engineer   July 2019 – January 2020
- Ensure any uploaded images would center and cover a div when uploaded via 'object-fit: cover' in CSS
- Converted certain images from .png to .svg to avoid pixelation issues caused when scaling from desktop to mobile
- Changed color of certain DOM elements to stay consistent with the client's current color theme
- Add on hover color change to links to further emphasize clickable content

Smart Landscape SD (https://smartlandscapesd.com)   San Diego, CA
Contracted Web Developer   October 2019 - November 2019
- Frontend: Gatsby; Backend: Sanity Headless CMS
- Redesigned static site with a working form for potential leads and added form call to action to each page

Calvine Landscape (https://calvinelandscape.com)   San Diego, CA
Contracted Web Developer   June 2019 – July 2019
- Frontend: Gatsby; Backend: Sanity Headless CMS
- Developed a lightbox modal for gallery component with a functioning left, right, and exit controls

Amazon   San Diego, CA
Logistics Associate & Deliveryperson   October 2018 – January 2020
- Tracked inventory for my designated route to ensure the correct number of packages were delivered
- Carefully handled and delivered 150+ packages a day to customers

Everyone Counts   San Diego, CA
Quality Assurance Engineer Intern   October 2014 – September 2015
- Developed script in Java to automatically export PDF from Google Chrome browser
- Submitted detailed bug reports via Jira software so that the development team could patch the bugs
- Created and executed test cases while adhering to established software quality standard
- Used regression testing after developers fixed bugs to ensure the software is operational

PERSONAL PROJECTS

Let Me In Application
- A CRUD application that allows a single user to add a home to a database with the corresponding gate/access code and search for the home while on route
- Frontend: React; Backend: Node, Express, MongoDB

SKILLS

- HTML, CSS, JavaScript, React, Node, Express, MongoDB, Git
- OS: MacOS, Windows

EDUCATION

California State Polytechnic University, Pomona   Graduation Class: Spring 2018
Bachelor of Science, Computer Engineering
